# 130 YEARS OF BIANCHI

**1885**  
1st Bianchi shop in Via Nirone, Milan

**1991**  
Bruno Zanchi - Down Hill World Champion

**1899**

Giovanni Tommaselli - Winner of the Gran Prix de Paris, the first Bianchi's race victory

**1915**

The 1st full-suspension bike

**1998**

Marco Pantani - Giro d'Italia and Tour de France victory

**2003**

Team Bianchi - Jan Ullrich

**2010**

Opening of the first Bianchi Café & Cycles (Stockholm)

**1947**

Fausto Coppi wins his first Giro d'Italia with Bianchi bike and in **1949** his first Tour de France

**2010**

The first Oltre is born

**2004**

Julien Absalon - Olympic Gold in Athen

**2013**

Introduction of the Infinito CV with Countervail vibration cancelling technology

**1973**

Felice Gimondi - World Champion

**2013**

Gerhard Kerschbaumer - U23 World Champion

# COUNTERVAIL® VIBRATION CANCELLING COMPOSITE TECHNOLOGY

## BIANCHI'S INVENTION TO CANCEL VIBRATION

Bianchi collaborated with **Materials Sciences Corporation** to develop our innovative and exclusive application of the patented Countervail® integrated vibration cancelling system for cycling. Scientific studies prove that long term exposure to vibration, typically absorbed by the rider, causes muscle fatigue and discomfort, resulting in reduced performance.

## INTEGRATED SYSTEM PROVEN IN NASA AEROSPACE OPERATIONS

Traditional passive damping of the frame using superficial rubber inserts and isolators are only marginally effective compared to the integrated carbon Countervail® system developed by Bianchi and proven in the extreme conditions of **NASA** aerospace operations. With its patented carbon fiber architecture and viscoelastic material, Countervail® carbon material, embedded within our unique Infinito CV and Aquila CV carbon lay-up, immediately cancels vibration while increasing the stiffness and strength of the entire frame.

## ADVANTAGES

- Maximized ride control and handling under normal to extreme vibration loads
- Reduced muscle fatigue and increased energy savings in distance rides
- Increased rigidity and peak power output over long distances

Bike with this technology: *Infinito CV; Aquila CV*

COUNTERVAIL® MATERIAL EMBEDDED WITHIN THE CARBON STRUCTURE

TRADITIONAL CARBON FRAME CONTINUES TO VIBRATE

BIANCHI FRAME WITH COUNTERVAIL® IMMEDIATELY CANCELS VIBRATION

**75%**  
INCREASED  
VIBRATION  
CANCELLING  
CAPACITY

- Bianchi's unique process to internally mold X-woven structural carbon layer
- Carbon strips are molded into the carbon structure of the head tube and BB area
- Exceptional torsional rigidity proven by Bianchi's professional riders

Bike with this technology: Oltre XR.2

### UTSS ULTRA THIN SEAT STAY

- Improved shock absorption and impact resistance
- Reduced frame weight
- Power transmission is now focused through the chain stays, leaving the seat stays as a compliant support structure

Bikes with this technology:  
Oltre XR.2; Oltre XR.1;  
Sempre PRO

WMP

WRINKLELESS MOLDING

- Wrinkles in the carbon material affect the property of the whole frame and add more weight
- Bianchi avoid wrinkles by pre-tuning the thickness of the laminate of each frame
- Increased frame and process efficiency
- Reduced weight

Bike with this technology: Oltre XR.2

## TRIPLE HYDROFORMED TECHNOLOGY

- Utilized at the top tube and head tube
- The tubes are welded together after initial hydroforming then inserted into another hydroforming mold and reshaped through the same process
- Provides a clean monocoque appearance while increasing the strength and steering response of the frame

Bike with this technology: Impulso

## ▲ B A T ▼ K-VID

- The combination between Bianchi Active Technology and the Kevlar Vibration Isolating Device allows us to obtain different stiffness behaviors under different forces directions, without wasting power transfer
- Special design of the rear rectangle
- Kevlar insertions in the seat stays and the carbon fork
- Improved shock absorption and adherence on the road

Bikes with this technology: Infinito CV (only BAT); Intenso; Impulso; Via Nirone 7 Alu

## ROAD DISC BRAKE SYSTEM

Bianchi is one of the first bicycle companies in the world to introduce **hydraulic** disc brakes in its Road carbon range. Infinito CV features a disc specific model with rear triangle and fork redesigned by Bianchi to accommodate the disc brake system. For 2015, Bianchi introduces the new Impulso aluminum frame with disc brake system and significantly reduced frame weight.

Bikes with this technology: [Infinito CV](#); [Impulso](#)

### TRIPLE WALL TUBE

- The down tube features a further inner carbon blade that makes up two separate bondless chambers
- Increased strength and rigidity to weight ratio
- Improved ride control

Bikes with this technology:  
all Methanol SL; SX and FS

- Reinforcement carbon ribs are embedded into the main tubes profiles
- Increased torsional stiffness of the head tube and the Bottom Bracket area
- The crank-frame interface becomes stronger

Bikes with this technology:  
all Methanol SL; SX and FS

- A titanium net is molded together with the carbon fiber on the down tube to protect the frame from possible impacts with stones and material thrown by the front wheel
- Improved impact resistance and frame lifetime

Bikes with this technology:  
all Methanol SL; FS

## DFIS

Possibility to cut the carbon seat tube and insert a traditional seat post (31,6mm) thanks to precise thickness calibration along the whole integrated seat post.

Bikes with this technology:  
all Methanol SL

## SHOCK ABSORBING STAYS

- Special designed stays with "S" shape and laminated with carbon/glass fibers enhance absorption of vertical shocks on the rear stays without weakening torsional stiffness
- Increased power transmission

Bikes with this technology:  
all Methanol; Ethanol and all Jab

## ASYMMETRICAL REAR STAYS

- Optimized rear stays design to obtain a very compact and reactive rear triangle without sacrificing the chainline clearance. It fits different chainrings combinations and it is optimized to improve power transmission on the driveside
- Increased power reactivity and pedalling performance

Bikes with this technology:  
all Methanol

# BIANCHI PRODUCT DEVELOPMENT

Bianchi believes the frame is the heart of the bicycle and is constantly investing in material technologies with the aim to produce the best bikes in the world. All frames are conceived, developed and tested inside the Bianchi headquarters in Treviglio (Bergamo, Italy), as are all graphic and colourschemes. Thanks to our Rapid Prototype Machine we can create and assemble, in house, a resin prototype of every model so that we can check the shape and final look of the frame before starting final production.

## **HOC - EXTREME RACING**

Ride beyond limits. The HoC category includes extreme racing performance carbon frames, optimized to achieve the most efficient power transmission with the best rigidity to weight ratio. The ideal bikes for the most expert riders.
